

Products

Clarification filters

BAG filters - Economical coarse clarification of product streams.

PB SERIES pleated bags - Cost-effective alternative to bag filters with optimized removal efficiency.

PROSPUN A - Spunbonded polypropylene filter for consistent, cost-effective particulate removal.

PEPLYN PLUS - Pleated polypropylene filter for effective particulate retention.

TETPOR LIQUID - Fine clarification or bioburden reduction of aggressive solvents.

TETPOR PLUS - All fluoropolymer construction for superior chemical resistance in the most aggressive processing conditions.

Air and gas filters

TETPOR AIR - Economical PTFE membrane sterilization of fermenter inlet air.

HIGH FLOW TETPOR II - High performance air and gas sterilization of fermenter inlet air and off-gas with unrivalled flow rates and steam life.

Final fill and finish

PROPOR SG - Fast reliable and cost-effective PES membrane sterilization of pharmaceutical liquids.

PROPOR BR - Effective bioburden reduction of pharmaceutical solutions.

PROPOR HC - High capacity sterilizing filtration for efficient processing of difficult to filter solutions.

PROCLEAR PP - All polypropylene filters for reliable filtration in aggressive processing conditions.

PROCLEAR GF - Glass fibre depth media for economical removal of particulate and microorganisms.

PROCLEAR GP - Combines glass fibre and polypropylene for maximum protection of membrane filters.

Other Parker products

PORECHECK IV - Water intrusion, pressure decay and bubble point testing of membrane liquid filters.

VALAIRDATA II - Aerosol challenge testing of sterile gas filters.

Filter housings

Wide range of housings from conventional stainless steel to chemically resistant Alloy 22 or PTFE with PED/ASME and ATEX 94/91/EC options available.

Utilities

Comprehensive range of compressed air and nitrogen generation solutions.
