

# Water Filtration

Protecting a natural resource

In industrial applications water treatment is employed to optimise processes such as heating, cooling, processing, cleaning and rinsing. Typically filtration is required in areas where scaling and corrosion occur. In scaling, precipitated mineral salts build up on metal surfaces in layers, as these layers grow the efficiency of heat exchangers will reduce through the insulating effect of the scale and thus energy costs will increase. Corrosion can lead to similar problems, but can also compromise the integrity of systems.

In order to achieve the specific requirement for each application removal of material, undesirable chemicals and biological contaminants must be achieved. Parker offers the broadest range of filtration products for the water service industry. From sub micron filtration in water cutting technologies to scale and corrosion particulate removal in boiler feed and post turbine waters.

Process water is typically filtered in large volumes with filters primarily being used in desalination and municipal water plants. Due to the volume of water filtered in these applications there is a requirement for larger diameter cartridges such as the PARMAX and MAXGUARD elements which are ideal for general clarification. This is because every reverse osmosis plant and water municipality requires a good level of pre-filtration to avoid costly and time consuming replacement of fouled membrane filters. Our CARBOFLOW range of carbon filters, are highly effective in removing chlorine from process water, providing performance that exceeds industry requirements.

When it comes to industrial water filtration, Parker domnick hunter can provide cost effective filtration solutions to meet your every need.

- Applications
- Water cutting
  - Desalination
  - RO membrane protection
  - Scale and rust removal
  - Boiler feed water
  - Post Turbine Water

PROSEP FILTER SYSTEMS LTD  
Unit G19  
River Bank Way  
Lowfields Business Park  
Elland  
West Yorkshire  
HX5 9DN

**Tel: 01422 377367**

**Fax: 01422 377369**

Email: [enquiries@prosep.co.uk](mailto:enquiries@prosep.co.uk)

**Map and Directions to Prosep Filters Limited**

Leave M62 at Junction 24.

At roundabout adjacent to Cedar Court Hotel take 2nd exit onto dual carriageway (A629), signposted Halifax.

Take 1st exit slip road.

At roundabout at end of sliproad, take 3rd exit off.

This is the entrance to Lowfields Business Park.

Proceed straight over 1st roundabout.

At next roundabout take 2nd exit onto River Bank Way - Prosep Filters can be found on the left after the S-bend.
