THMS	**	**	**	**

* Good removal ** Excellent removal

Choosing the right domestic water filtration system for you will depend upon the quality of water required. If you simply want to improve colour, taste and odour, then a **CHEM-*pro* System** will suffice. The **HM-*pro* System** should be chosen if removal of heavy metals is required. For the treatment of spring water the **RO-*pro*** and **UV-*pro* Systems** are more appropriate. Most systems can be modified and adapted to include additional stages of filtration, such as sediment cartridges, pre-carbon filters, lime-scale inhibitors and post carbon filters. If you need assistance in deciding which is the correct product for you, please do not hesitate to give us a call and we will be happy to discuss your individual domestic filtration requirements.
